

m\_display::len\_f\_cpId

m\_display::len\_s\_cpId

m\_display::len\_f\_dble

```
graph LR; A[m_display::len_f_cpId] --> C[m_display::len_f_dble]; B[m_display::len_s_cpId] --> C;
```

The diagram illustrates a data flow or dependency. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'm\_display::len\_f\_cpId' and the bottom box contains 'm\_display::len\_s\_cpId'. On the right, there is a gray rectangular box with a black border containing the text 'm\_display::len\_f\_dble'. Two blue arrows originate from the right side of the two white boxes and point towards the left side of the gray box, indicating that the two left-hand variables are inputs or sources for the right-hand variable.
